

ABSTRACT OF THE DISCLOSURE

In a magnetic tape apparatus for  
controlling a running of a magnetic tape to stop at a  
reference stop position, a control part controls the  
5 feed reel shaft and the take-up reel shaft to reel  
the magnetic tape and a stop position control part  
displaces a stop position of the magnetic tape from  
the reference position wherein the control part  
activates the stop position control part to displace  
10 the stop position when the control part stops running  
the magnetic tape.
